

## Fill in the gaps

| You and I go hard                                       | Using my head let it all go                 |
|---|---|
| At each other like we're going to war                   | Now you're (11) on my body                  |
| You and I go rough                                      | On my (12) like a tattoo                    |
| We (1) throwing things and slamming the door            | And now I'm feeling stupid                  |
| You and I get so damn dysfunctional                     | Feeling stupid crawling back to you         |
| We (2) keeping score                                    | So I cross my heart and I hope to die       |
| You and I get sick                                      | That I'll only (13) with you one more night |
| Yeah I know that we can do this no more                 | And I know I said it a million times        |
| But baby there you go again                             | But I'll (14) stay (15) you one more        |
| There you go (3) making me love you                     | night                                       |
| Baby I stopped (4) my head                              | Yeah (16) give me one more night            |
| Using my head let it all go                             | Yeah (17) give me one more night            |
| Now you're stuck on my body                             | Yeah (18) give me one more night            |
| On my body like a tattoo                                | Baby there you go again                     |
| And now I'm (5) stupid                                  | There you go again making me love you       |
| Feeling stupid crawling back to you                     | I stopped using my head                     |
| So I cross my (6) and I (7) to die                      | Using my head let it all go                 |
| That I'll only stay with you one more night             | Got you stuck on my body                    |
| And I know I said it a (8) times                        | On my body like a tattoo                    |
| But I'll only stay with you one more night              | So I cross my heart and I hope to die       |
| Try to tell you no                                      | That I'll (19) stay (20) you one more       |
| But my body keeps on telling you yes                    | night                                       |
| Try to tell you stop                                    | And I know I said it a million times        |
| But (9) lipstick got me so out of breath                | But I'll (21) stay with you one (22) night  |
| I'll be waking up in the morning probably hating myself | -Yes baby (23) me one more time-            |
| And I'll be waking up feeling satisfied                 | So I cross my heart and I (24) to die       |
| But guilty as hell                                      | That I'll only stay with you one (25) night |
| But baby (10) you go again                              | And I know I said it a million times        |
| There you go again making me love you                   | But I'll only stay with you one more night  |
| Baby I stopped using my head                            | -I don't know, whatever, whatever-          |

## Fill in the gaps
