Way In The World by Nina Nesbitt

Wonder where your dreams go?

Fill in the gaps

I'm working in a retail store	Do you fell (6) you're falling under
It's not (1) I'm cut out for	Under it all?
I live for my breaks	And I storm out of work and I take my seat
I know there's something more	At the front of the bus
So much to explore	And my headphones bleed
But it feels so far away	And right there in a flash
I'm not lost, I'm just finding	With (7) on my cheeks
My own way in the world	I can suddenly see
I'm not lost, I'm just finding	We're not lost, we're (8) finding
My own way in the world	Our own way in the world
In the big old world	We're not lost, we're just finding
Do you ever, do you ever, do you wonder	Our own way in the world
Wonder where (2) dreams go?	In the big old world
Do you fell like you're falling under	Do you ever, do you ever, do you wonder
Under it all?	Wonder where your dreams go?
Do you ever, do you ever, do you wonder	Do you fell like you're falling under
Wonder where your dreams go?	Under it all?
Do you fell (3) you're falling under	Do you ever, do you ever, do you wonder
Under it all?	Wonder where your dreams go?
I don't know if it's bad or good	Do you fell like you're (9) under
Walking (4) this street without you	Under it all?
I don't know quite what I want	Do you ever, do you ever, do you wonder
One (5) I've got	Wonder where (10) dreams go?
Is a good idea of what I'm not	Do you fell like you're falling under
I'm not lost, I'm just finding	Under it all?
My own way in the world	Do you ever, do you ever, do you wonder
I'm not lost, I'm just finding	Wonder where your dreams go?
My own way in the world	Do you fell like you're falling under
In the big old world	I'm not lost
Do you ever, do you ever, do you wonder	I'm just finding
Wonder where your dreams go?	My own way
Do you fell like you're falling under	In the world
Under it all?	In the big old world
Do you ever, do you ever, do you wonder
