

## Fill in the gaps

| You (1) (2) you'd seen a                           | On the day you wake up (19) somebody       |
|--|--|
| ghost  | And you've learned                         |
| And I (3) in                                       | It's okay to be afraid                     |
| I lack the (4) you need the most, you said         | But it will (20) be the same               |
| Where have you been                                | And as the (21) move in                    |
| You wasted all that sweetness to run and hide      | And (22) body starts to sink               |
| I (5) why  | I was the last thing on your mind          |
| I (6) you of the days you (7)                      | I know you better (23) you think           |
| your heart into                                    | 'Cause it's simple, darling                |
| But you never tried                                | I gave you a warning                       |
| I've fallen from grace, took a blow to my face     | Now (24) you own                           |
| I've loved and I've lost, I've loved and I've lost | Is falling from the sky in pieces          |
| Explosions   | So watch (25) fall with you in slow motion |
| On the day you (8) up (9)                          | I pray (26) you'll find peace of mind      |
| somebody   | And I'll find you another time             |
| And you've learned                                 | I'll love you, another time                |
| It's okay to be afraid                             | Explosions                                 |
| But it (10) never be the same                      | On the day you wake up needing somebody    |
| It will (11) be the same                           | And you've learned                         |
| You (12) my soul bleeding in the dark              | It's okay to be afraid                     |
| So you could be king                               | But it will never be the same              |
| The rules you set are still untold to me and I've  |  |
| Lost my faith in everything                        |  |
| The nights you (13) cope                           |  |
| Your (14) were gold                                |  |
| But the (15) shake                                 |  |
| I (17) to (18) I can still make explosions         |  |
