The Big Bang Theory by Barenaked Ladies

Our whole universe was in a hot dense state,
Then nearly fourteen billion years ago expansion started.
Wait...
The Earth began to cool,
The autotrophs began to drool,
Neanderthals developed tools,
We built a wall (we built the pyramids),
Math, science, history, unraveling the mysteries,
That all started with the big bang!
"Since the dawn of man" is really not that long,
As every galaxy was formed in less time than it takes to sing
this song.
A fraction of a (1)_____ and the elements were
made.
The (2)_____ stood up straight,
The dinosaurs all met their fate,

And they all died (they froze their asses off)
The oceans and pangea

Set in (3)_____ by the same big bang!
It all (4)_____ with the big BANG!
It's expanding ever outward but one day
It (5)_____ pause then start to go the other way,
Collapsing ever inward, we won't be here, it won't be hurt
Our best and brightest figure that it'll make an even bigger
bang!

Debating why were here they're catching deer (we're catching
viruses)
