

Fill in the gaps

Car is parked	He's the air I would (6) to breathe
Bags are packed	Holds my love in his hands
But what kind of heart doesn't (1) back	Still I'm searching for something
At the comfortable glow from the porch	Out of breath
The one I (2) still call yours?	I am (7) hoping someday
All those words came undone	l'II (8) again
And now I'm not the (3) one	It hurts to be here
Facing the ghosts that decide	I only wanted love from you
If the fire inside still burns	It hurts to be here
All I have, all I need	What am I gonna do?
He's the air I would kill to breathe	All I have, all I need
Holds my love in his hands	He's the air I (9) kill to breathe
Still I'm (4) for something	Holds my love in his hands
Out of breath	Still I'm searching
I am left hoping someday	All I have, all I need
I'll breathe again	He's the air I would kill to breathe
I'll breathe again	Holds my love in his hands
Open up next to you	Still I'm searching for something
And my secrets become your truth	Out of breath
And the distance between	I am left hoping someday
That was sheltering me comes in full view	I'll breathe again
Hang my head, break my heart	I'll breathe again
Built from all I have (5) apart	I'll breathe again
And my burden to bear	I'll breathe again
Is a love I can't carry anymore	
All I have, all I need
